

Health Care Facilities Solutions

All health care facilities are unique. Large hospitals have different facility needs than small community hospitals or clinics, while long term care facilities have different needs than ambulatory surgery centers. What they all share, however, is a need for managing facility operating costs without compromising the quality of patient care. The McQuay Solutions Group understands that health care facilities face unique challenges.

How is the Health of Your Facility?

We can help you achieve lower operating costs and a quality healing environment for patients. Our systems are designed for optimum efficiency and reliability while providing comfort for patients or staff. See the back of this brochure for examples of innovative McQuay systems that can reduce your operating costs through energy efficiency.

The McQuay Solutions Group understands the special challenges facing health care facilities means that we can team with you to find effective solutions to help you manage your capital constrained costs. With the McQuay Solutions Group on your team, you can focus on your facility's mission, providing patient and community health care.

How We Team with You

- We work with the Board, facility operations and engineering personnel to ensure financial, design and operations management decisions are carefully evaluated, selected and implemented
- We offer National Accounts GPO purchasing to reduce costs
- We offer responsive and flexible packages: equipment only, service and repair, turnkey project management, system renovations and expansions as your facility grows

Our Expertise

- Engineering and environmental assessment
- Information for sound investment in your HVAC system - when to upgrade, when to replace
- Building monitoring and performance reports
- Financial energy efficient project planning and management
- Indoor air quality and ventilation improvements
- Power quality and reliability
- Quiet operation for a healing environment
- Planned maintenance agreements
- Utility billing analysis and demand charge reduction
- LEED[®] Green Building Rating System consulting
- Energy and HVAC management

McQuay Offers a Wide Variety of Equipment and System Options for Health Care Facilities of All Sizes

Pathfinder™ Air Cooled Chiller

175 to 530 tons

Pathfinder™ air cooled chillers have the highest efficiency available in their class.

Magnitude™ Frictionless Centrifugal Chiller

145 to 400 tons

Magnitude™ water cooled chillers have the highest efficiency available in their class.

Vision™ Indoor Air Handler

900 to 100,000 cfm

McQuay Vision™ air handlers are available with both pressurization controls and filters for operating rooms and laboratories.

Modular Central Plant

Up to 3,600 total tons

Our Modular Central Plant is designed for fast-track installation for minimal disruption for patients and faster occupancy of renovated or expanded space.

Templifier™ Water Heaters

600 to 19,200 MBh

Templifier™ Water Heaters are a unique heat recovery system that can reduce the energy required to heat water for laundries or kitchens.
